

**Introducing the CFS-1700M  
Biometric Mortise Lock  
< High Security >**

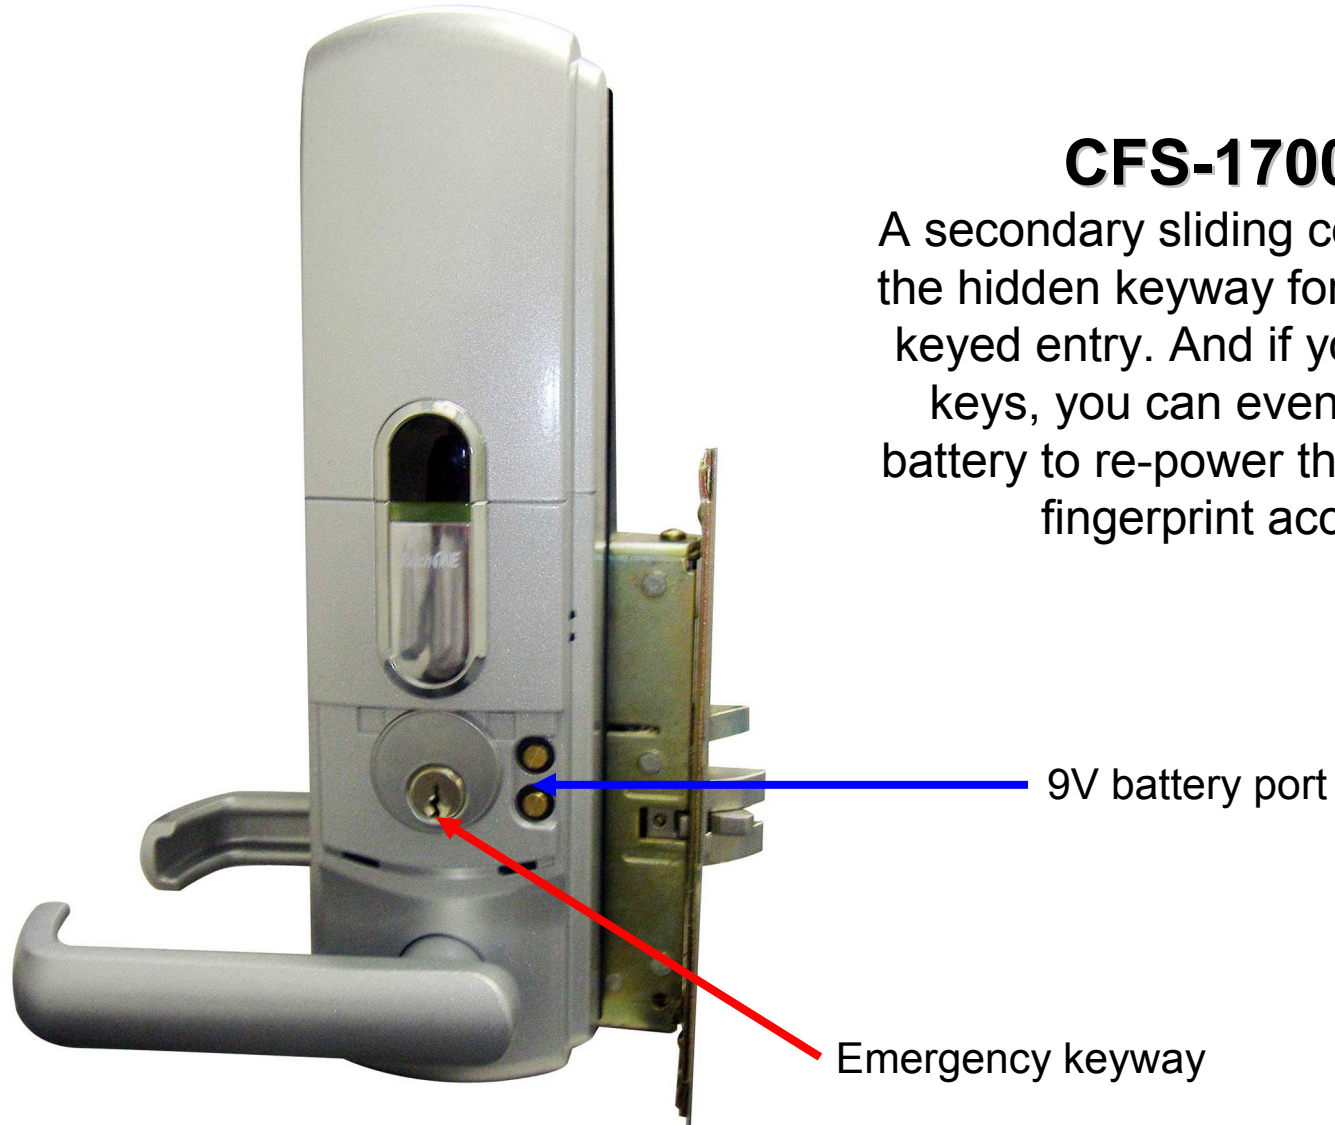

## **CFS-1700M**

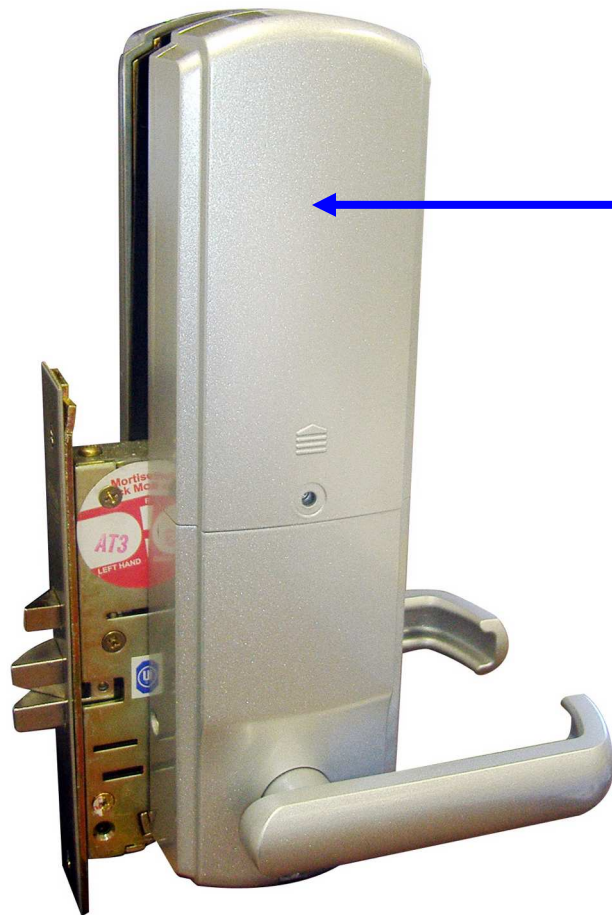

Utilizes a sliding cover to hide and protect the biometric sensor, PIN pad, and LCD.

Then simply touch your fingerprint to the sensor glass and the door will open when verified.

## CFS-1700M

A secondary sliding cover reveals the hidden keyway for emergency keyed entry. And if you lost your keys, you can even use a 9V battery to re-power the sensor for fingerprint access.

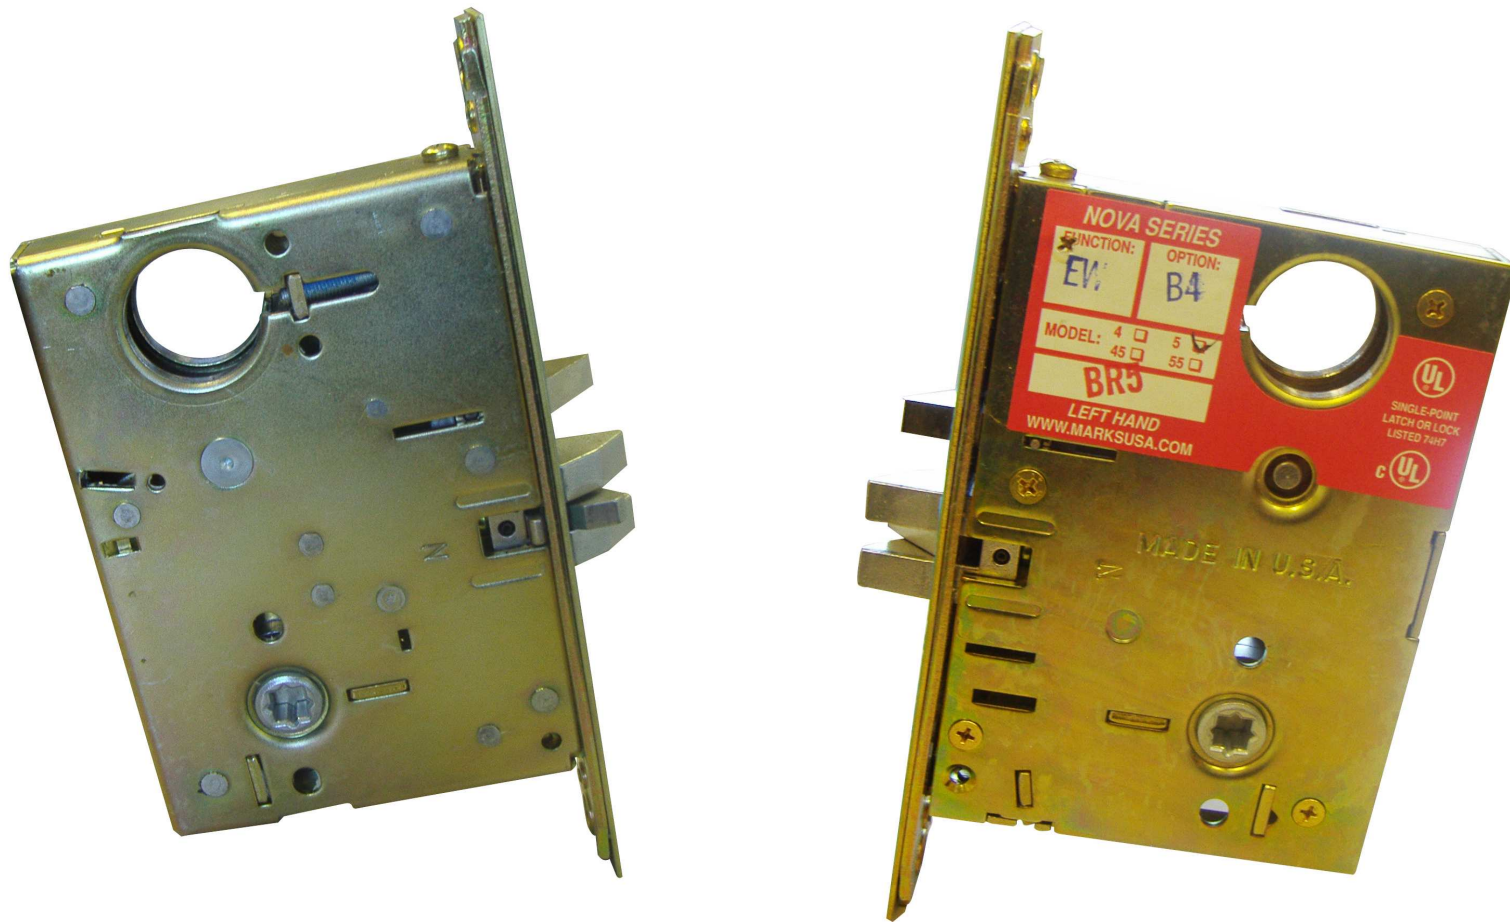

Battery Cover

## **CFS-1700M**

Inside view of the lock.

Simple, clean lines.

(8) AA batteries are hidden  
under battery cover.

## **CFS-1700M - The Mortise**

Outstanding mortise quality – ANSI Grade 1,  
UL-Listed, and extremely high security.  
US-style mortise - should replace most  
vestibule-style mortises in the USA and UK.
